The Basics of Clean Energy Biofuels (CEB) Biodiesel

CEB Biodiesel is a better biodiesel. ► We produce a better biodiesel because we use only recovered oils from local food service providers and we process those oils locally using 100% solar power. We do not use virgin oils.

CEB Biodiesel is a local fuel. ► Our feedstock is local, our production is local, and we only sell to local customers.

CEB Biodiesel is a cleaner fuel. ► Biodiesel produces far less toxic emissions. Compared to conventional diesel fuel, biodiesel reduces emissions related to asthma and cancer. It contains no sulfur and is carbon-neutral (possibly carbon-negative when using recovered oil-based biodiesel).

CEB Biodiesel is a safer fuel. ► Biodiesel is 100% non-toxic, less toxic than even table salt, and biodegrades at the same rate as sugar, about four times faster than petroleum diesel. This makes biodiesel safer to store, handle and clean up.

CEB Biodiesel is a domestic fuel. ► Biodiesel helps reduce demand for petroleum and reduces our dependence on foreign oil. Using CEB biodiesel also ensures that your fuel is local and not made in the Midwest (or elsewhere), which helps the local economy.

CEB Biodiesel is a compatible fuel. ► Biodiesel can be used in any diesel engine without conversions. It adds lubricity to your engine and help clean out old sulfur residue left from petroleum diesel fuel. Please check with your manufacturer for guidelines while using biodiesel in your particular vehicle.

► For More Information on Biodiesel —

Visit the National Biodiesel Board, the trade agency that oversees the biodiesel industry in the US and of which we are a member. Especially useful is their *Guide to Buying Biodiesel*.

CEB Retail Biodiesel Fueling Station

Our retail biodiesel station is a partnership of **Southern Alliance for Clean Energy** and **Clean Energy Biofuels**. It is also part of the U.S. Department of Energy's I-75 Green Corridor program, which seeks to create the longest alternative fuels corridor in the United States traversing six states from Florida to Michigan. The East Tennessee Clean Fuels Coalition is the project lead and manager while the Center for Transportation and Environment (CTE) is the project manager for the greater Atlanta portion of the corridor.

Southern Alliance for Clean Energy is a nonprofit, nonpartisan organization working to promote responsible energy choices that create global warming solutions and ensure clean, safe, healthy communities throughout the Southeast. www.cleanenergy.org

Clean Energy Biofuels is the only full-service biodiesel company in Georgia that provides all services under one company — collecting the waste cooking oil, producing the biodiesel, blending the biodiesel, delivering bulk biodiesel, and selling biodiesel retail. CEB is dedicated to fueling smart solutions for our country's energy needs. www.cleanenergybiofuels.com

Join the effort ►

Buying biodiesel from us also helps support the advocacy work of the Southern Alliance for Clean Energy — promoting renewable energy across the Southeast. Send us an email at info@cleanenergy.org and we'll add you to our email list to keep you up-to-date on important clean energy issues.

Help CEB's biodiesel business by dropping off your used cooking oil in the bin next to the retail unit or by suggesting our grease pick up services to your favorite restaurants.
